Clean Energy Alliance

JOINT POWERS AUTHORITY

Clean Energy Alliance Community Advisory Committee Application

CAC Purpose & Objectives

The purpose of the CAC is to advise the CEA Board of Directors on those matters concerning the operation of its Community Choice Aggregation (CCA) program as directed by the Board of Directors in an annual workplan for the CAC that is adopted by the Board. The objectives of the CAC are to provide feedback to the Board, act as a liaison between the Board and the community and serve as a forum for community input on those matters assigned to the CAC in the annual workplan. The CAC shall not have any decision-making authority but will serve as an advisory body to the Board of Directors.

NAME: Paul A. Basore

ADDRESS: [REDACTED] Solana Beach, CA 92075

PHONE: [REDACTED] EMAIL: [REDACTED]

Are you a resident/business owner of one of the CEA member cities?

If yes, which city: Solana Beach

Please attach a current resume and respond to the following questions. Please attach a separate sheet if additional space is needed.

What experience/perspective will you bring to the committee?

My career in solar photovoltaics has spanned university, government, and industry positions in the USA, Australia, and Germany. This has given me a broad perspective on the promise and challenges of transitioning to a renewable-energy future on a global scale. At the local level, my years as administrative Group Leader for my son's Scout group and my years as an officer in my neighborhood HOA have improved my ability to work effectively with neighbors having diverse social and political priorities.

While these experiences give me an appreciation for all elements in the proposed CAC work plan, including community outreach and social equity, probably my primary contribution to the committee would be my expertise in the field of renewable energy, coupled with a deep understanding of the physics that govern the electric power grid.

Describe any relevant background in or expertise related to one or more of the following fields: electricity, community outreach or engagement, or policy advocacy.

Electricity: I have a bachelor's and PhD in Electrical Engineering, the latter from the Massachusetts Institute of Technology, where my 1982 thesis in the Electric Power Systems Engineering Laboratory was focused on residential energy storage. I worked full-time for 30 years in silicon photovoltaic solar power technology, leading R&D teams that developed the solar panels that are now extensively deployed worldwide.

Community Engagement: Shortly after moving to Solana Beach in 2016, I was appointed to the city's Climate Action Commission and was reappointed this year. The Commission advises City Council on matters related to its Climate Action Plan, including community outreach.

Policy Advocacy: In 2018, I volunteered more than 100 hours to help get Mike Levin elected to the U.S. Congress, motivated by his advocacy for clean-energy policies.

Do you have any interests or associations that might present a conflict of interest? If yes, please explain:

I own the solar PV system on the roof of my house, and its associated battery storage.

The system generates more energy than I consume, so I would personally benefit from policies that compensate utility customers for supplying excess clean energy to the grid, or that reward residents who utilize on-site battery storage to assist with load leveling.

I am retired, but occasionally receive compensation for consulting related to solar power, primarily evaluation of funding proposals for the U.S. Department of Energy.

I am not aware of any other interests that might present a perceived conflict of interest.

What do you hope to accomplish as a member of the Clean Energy Alliance Community Advisory Committee?

The rolling blackouts in August affected the Solana Energy Alliance, demonstrating that just because a CCA has contracted for enough kWh's of energy does not guarantee that the power will be available when needed. A related misunderstanding arises over the meaning of 100% renewable power. The commercial organizations that support and advise municipal CCAs are naturally reluctant to represent the full complexity of supplying power on a minute-by-minute basis. I hope to be able to help the CEA Board by providing an independent assessment of the various energy-supply options available, so the Board can better understand the implications of their decisions. My input may help the Board avoid missteps on the path to a renewable future, missteps that critics (including those with a vested interest in fossil fuels) could use to frustrate CEA's effort to supply clean energy.

PAUL A. BASORE

Solana Beach, CA 92075 | [REDACTED] | [REDACTED]

SUMMARY: Extensive career in solar power spanning university, government and industrial positions across three continents. Managed the establishment and operation of five solar R&D facilities and developed software tools that

are widely used for silicon photovoltaic solar cell characterization and manufacturing cost modeling. Advisor to federal, city, and university solar programs.

ACADEMIC QUALIFICATIONS

- Doctor of Philosophy**, Electrical Engineering
Massachusetts Institute of Technology (1982)
- Bachelor of Science**, Electrical Engineering
Oklahoma State University (1978)
- Certificate**, Strategic Decision and Risk Management
Stanford Center for Professional Development (2013)

COUNCILS, BOARDS, AND COMMISSIONS

- 2018-** San Elijo Hills Homeowners Assoc., Officer
- 2017-** Climate Action Commission, City of Solana Beach
- 2016-** Scientific Advisory Board, AZ State Univ. QESST
- 2014-** IEEE Photovoltaics Technical Committee
- 1993-** Editorial Board, *Progress in Photovoltaics*

RECENT EMPLOYMENT HISTORY

- 2016-2017** U.S. Department of Energy, Washington, DC
Chief Engineer, Solar Energy Technologies Office
Led technical strategy across the \$240M/yr SunShot program, including the development of a multi-year \$1B program plan for the period 2018 – 2022.
- 2014-2016** National Renewable Energy Lab, Golden, CO
Center Director, Materials Applications and Performance
Managed a group of 75 researchers and associated laboratory facilities focusing on solar photovoltaics.

ENTREPRENEURIAL HISTORY

- 2014-** PV Specialist Services
Individual consulting business focused on silicon photovoltaic solar power technology. Services provided to SunPower Corporation, Hanwha Solar America, Arizona State University, U.S. Department of Energy.
- 2011-2014** Hanwha Solar America
Laboratory Director, Advanced R&D Lab
Helped establish a \$12M R&D lab in Silicon Valley to develop silicon solar cell technologies for multinational parent Hanwha Corporation, which is now one of the world's top-five solar panel producers, having major manufacturing sites in China, Malaysia, and Korea.

2007-2011 Renewable Energy Corporation
Managing Director and President

Established and managed a California R&D subsidiary to develop silicon solar cell technology for the multinational parent corporation having manufacturing sites in Norway, Singapore, and the United States.

2004-2007 CSG Solar AG
Chief Technical Officer

As one of three founders, established this privately held company in eastern Germany, raising €50M from investors. Successfully set up continuous manufacturing of photovoltaic solar panels.

1995-2004 Pacific Solar Pty. Ltd.

Deputy Research Director, Manufacturing Development
Helped establish a spin-off company from The University of New South Wales in Sydney, Australia to commercialize silicon solar cell technology. The company attracted A\$60M investment over 10 years.

ACADEMIC POSITIONS

- 1995-1999** The University of New South Wales, Australia
Assoc. Prof of Electrical Engineering
- 1982-1986** Iowa State University, Ames, IA
Assoc. Prof. of Electrical and Computer Engineering

INDIVIDUAL RECOGNITIONS

- 2003** *Outstanding Paper Award*
World Conference on Photovoltaic Energy Conversion
- 1997** *Conference Chair*, Photovoltaic Specialists Conf.
Premier international conference for photovoltaics
- 1983** *Outstanding Electrical Engineering Faculty Award*
Elected by EE students at Iowa State University

COMPUTER PROGRAMS WRITTEN

- PC3D:** Solar cell 3D device physics simulation (2019).
- PV Costpoints:** Manufacturing cost estimation (2014).
- POEM:** Database manager for R&D lab activity (1989).
- PC1D:** World's first solar cell simulator for PCs (1985).

WEBSITES SUPPORTED

- PC3D.info:** Free download of PC1D and PC3D programs.
- PVlighthouse.com.au:** Website for PV professionals.
Publish white papers, produce on-line calculators, and maintain a list of independent PV consultants, all as a free service to the PV community.

PATENTS AND PUBLICATIONS

- Listed inventor** on 9 issued U.S. patents.
- First author** of 13 papers in refereed scientific journals and 17 international conference presentations.
- Number of citations** reported by Google Scholar: >3800.

Community Advisory Committee Application

CAC Purpose & Objectives

The purpose of the CAC is to advise the CEA Board of Directors on those matters concerning the operation of its Community Choice Aggregation (CCA) program as directed by the Board of Directors in an annual workplan for the CAC that is adopted by the Board. The objectives of the CAC are to provide feedback to the Board, act as a liaison between the Board and the community and serve as a forum for community input on those matters assigned to the CAC in the annual workplan. The CAC shall not have any decision-making authority but will serve as an advisory body to the Board of Directors.

NAME: Lee Haydu

ADDRESS: [REDACTED] Solana Beach 92075

PHONE: [REDACTED] EMAIL: [REDACTED]

Are you a resident/business owner of one of the CEA member cities?

If yes, which city: Solana Beach

Please attach a current resume and respond to the following questions. Please attach a separate sheet if additional space is needed.

What experience/perspective will you bring to the committee?

- Del Mar City Council 2010-2014
- While on Council, I worked with Barbara Boxer's office to decommission San Onofre and we had success June 2013.
- Member of the 22nd DAA Sustainability committee 2018 to March 2020.
- SANDAG Board Member 2010-2014

Describe any relevant background in or expertise related to one or more of the following fields: electricity, community outreach or engagement, or policy advocacy.

While on the Del Mar City Council I worked with different agencies and I have kept many of those contacts.

When on the board of the 22nd DAA, I worked with Solana Beach and Del Mar to get the 3 public entities to work together.

We solved many issues but the main issue was dealt with fair traffic that effects everyone. We bought many agencies that deal with traffic (SANDAG, Caltrans, CHP, Sheriff and San Diego Police) to help us solve the problems.

I have served on many boards and committees and have engaged in public outreach for ballot measures and community programs.

Do you have any interests or associations that might present a conflict of interest? If yes, please explain:

No

What do you hope to accomplish as a member of the Clean Energy Alliance Community Advisory Committee?

I want to build on my regional relationships to help bring other cities on board and to grow and strengthen the JPA.

Support a successful launch of CEA by assisting with community outreach and education.

Advise CEA Board members on policy issues and programs on policy that will further the climate goals for Solana beach and to make my city more resilient.

NAME: Debra Schade, PhD

ADDRESS: [REDACTED], Solana Beach, CA 92075

PHONE: [REDACTED] EMAIL: [REDACTED]

Are you a resident/business owner of one of the CEA member cities?

If yes, which city: Solana Beach

Please attach a current resume and respond to the following questions. Please attach a separate sheet if additional space is needed.

What experience/perspective will you bring to the committee?

As a 22 year resident of Solana Beach I am very familiar with the work our city pioneered in the area of community choice energy. I am currently participating in this program for my primary residence. I have served 18 years on the Solana Beach School Board of Education and am the current vice president. As an elected official have important experience in policy, budgets and collaborative decision making. I have proven record of establishing and maintaining productive working relationships with key stakeholders at multiple levels within an organization. I am a team player and enjoy collaboration and

consensus building among groups. I have experience in business leadership, project management, educational development and hands-on research. For the past ten months I have been attending the Clean Energy Alliance meetings, both in person and virtually. I have had the opportunity to speak at in person meetings during public comment and I have great interest in continuing the valuable work the Alliance in doing.

Describe any relevant background in or expertise related to one or more of the following fields: electricity, community outreach or engagement, or policy advocacy.

In my role as a member of the Solana Beach School District (SBSD) Board of Trustees I have been actively engaged in 1) community outreach and engagement on several programs and projects including the LCAP process, 2) passing a local General Obligation Bond for school construction and modernization, 3) acquisition of property, design and construction for new schools to name a few. I have experienced leadership in all facets of community engagement related to student outcomes, school construction, strategic planning and more. During my tenure on the SBSB board I was first elected to the San Diego County Delegate Assembly for the California School Boards Association and then elected to the Board of Directors for the same organization. These high profile roles have given me additional experience in policy and legislative advocacy for school districts and students in California. I work closely with our regional, state and federal legislators on issues that impact schools and public education. I have worked +closely with our Chief Business Officer with utilities budgeting – including electricity rates. I have gained most of my knowledge of regulatory and other issues related to CCA programs through my attendance and observations at the Clean Energy Alliance meetings.

Do you have any interests or associations that might present a conflict of interest? If yes, please explain:

My original interest in the Clean Energy Alliance was to gain an understanding of our school district's and other governmental agencies potential benefit of their membership in a CCA. Although I don't see this as a conflict of interest, I do believe I have a level of advocacy that is beneficial in understanding the role of governmental agencies in a CCA.

What do you hope to accomplish as a member of the Clean Energy Alliance Community Advisory Committee?

As a member of the CEA Community Advisory Committee I would like to meet or exceed climate action goals for our community. With a large array of experience in community outreach, I believe I will add value to this committee in targeting our underserved communities. As part of my school district role I have many years participating in the strategic planning process, establishing and benchmarking short and long term goals. My experience will be an asset to this committee as it sets goals and defines vision toward the future. I will advocate for the scope of the stated CEA goals in terms of equity and innovation. I am a lifelong learner with a passion for collaboration and consensus building for the greater good. I would be honored to serve on the Clean Energy Alliance Community Advisory Committee.

DEBRA H SCHADE

Solana Beach, CA

SUMMARY

Experience in business leadership, project management, educational development, implementation and hands-on research. Record of establishing cooperative relationships among key stakeholders. Evidence of data driven decision making and collaborative leadership. A self-motivated and lifelong learner with a high value reputation for integrity and strategic execution.

EXPERIENCE

CONNOR ASSOCIATES – RESEARCH ANALYST

2019 - present

Researcher involved in outreach enrollment management, admission, retention, advancement, and communication support for next-level high school. Analysis of Marketing and Enrollment Feasibility Studies, Internal Marketing KPI Assessments, External Image Audits and Alumni Outcomes Surveys, Institutional Strategic Planning facilitation & Marketing Plans.

- Performed marketing research for elevating next-level high schools.
- Gathered input for key admissions, retention and advancement decisions.
- Generated research reports and analysis regarding school climate, threats or opportunities, 21st Century Learning, and service to the community to enable data driven decisions by school leadership.

SOLANA BEACH SCHOOL DISTRICT - BOARD OF TRUSTEES

2002 –present

The Solana Beach School District (SBSD) board oversees a \$40M budget for 3,200 K-6 students and seven schools plus a Child Development Center for toddlers and student after school support. SBSB President 2016-2018, 2009-2011. San Diego County School Boards Association, VP 2016-present. California School Board Association Delegate, 2016-2019. Board of Directors California School Board Association, 2020-present.

- Built and opened 2 new elementary schools- Solana Pacific Elementary and Solana Ranch Elementary.
- Redesigned district school nutrition program to improve student nutrition and provide healthy school lunches.
- Established strategic planning and development of a district wide multi-tiered Social and Emotional Learning program.
- Passed a \$105 million general obligation bond for school construction.
- Strategic planning and execution of construction projects for older schools and modernization of existing facilities.
- Instrumental voice for community engagement in the LCAP process.
- Tireless committees volunteer whenever & wherever advocacy for student wellness and academic excellence is needed.
- Recipient of 6 California Distinguished School Blue Ribbon Awards. District awarded California School Board Association (CSBA) Golden Globe Awards in Strategic Planning (2008), Staff Development (2010) and STEM Education (2016).

IP VIDEO NETWORKS, INC. - BUSINESS ANALYST

2007- 2018

Television broadcast equipment manufacturing and sales into markets worldwide.

- Business strategy and Board Member.
- Life cycle growth management including staffing, processes and productivity tools.
- Responsible for company human resources and payroll.
- Responsible for accounts payable and accounts receivable.
- Provided company forecasting and developed operational budgets.

SAN DIEGO STATE UNIVERSITY FOUNDATION - RESEARCH ASSOCIATE

1996 - 1998

Center for Behavioral Epidemiology and Community Health (CBEACH), San Diego State University

- Project Director for cardiovascular health intervention to determine the efficacy of a community-based, culturally tailored exercise and dietary intervention on the physical activity and physiologic outcomes of low-income Latino women.
- Responsibilities included overall project management including staff, facility, nutrition and exercise classes and project participants.
- Curriculum development for project classes utilizing andragogy and cultural tailored content.
- Developed and trained staff in exercise testing protocol for pre and post project evaluation.
- Established the project database and managed the data analysis.
- Worked closely with the Principal Investigator in developing the validity of the interview instrument and outcome measures for participants.

UNIVERSITY OF ALABAMA - RESEARCH ASSISTANT

1993 - 1996

Health Research Consulting Service, College of Health Sciences

- Responsible for data collection and research for department projects.
- Performed data management and statistical analysis for multiple health research projects.
- Lead research assistant for the Department of Maternal and Child Health, Graduate School of Public Health, University of Alabama at Birmingham responsible for data collection for WIC study. Prepared annual program evaluation, report and presentation.

UC SAN DIEGO - ADJUNCT FACULTY

1986 -1993

Department of Physical Education, University of California, San Diego

- Developed curriculum and taught Physical Fitness and Health Minor lecture and lab courses, activity courses and certification classes.
- Served as Program Supervisor of the UCSD Fitness and Lifestyle Program for faculty and staff.
- Led the training for students involved with the UCSD Student Health Advocate program.
- Taught lecture and lab courses with UCSD Summer Session.
- Curriculum development and lecturer for nutrition and wellness courses for the UCSD Staff Education program.
- Served on faculty committee for UCSD Extension Fitness Management Certification Program.
- Served on several university wide committees for the promotion of student health at UCSD.
- Coached masters swimming as a UCSD Recreation instructor.
